Introduction

"Implementing or integrating complex cloud solutions is not just a matter of understanding the technology behind those systems but it also requires an understanding of the business itself and the impact an implementation can have on the client's business".

The numerous projects I have been doing in the past 25 years gave me a solid technological experience in SAP and surrounding integration/internet/cloud technologies, combined with a clear understanding of a client's business and his need(s) for integration in the complex cloud-driven consumer world. I have been mainly focusing on integrating SAP systems via the cloud (both 'front-end' and 'backend') and on development of high-end custom solutions within the SAP system itself.

I can assist a client during the whole evolution of a project, from the initial "brainstorming & design" till the "technological implementation & delivery".

General Information

Name	De Saeger
First name	Steven
Date of Birth	27th march 1974
Languages	Dutch, English and French
Work Experience	- 25 years of technical development & consultancy - functional high-level knowledge of several SAP solutions
E-mail	steven.de.saeger@sedacrivity.be
LinkedIn	http://www.linkedin.com/in/sedacrivity
Website	http://www.sedacrivity.be

Education / Knowledge	
Degree(s)	- A1 Graduate Informatics, 1995 Sint-Lodewijk Antwerp - Higher Art Degree DKO, painting, Royal Art Academy of Antwerp - Higher Art Degree DKO, model drawing, Art Academy of Sint-Niklaas
Technology Experience 25 years	- SAP Cloud, Cloud Foundry, MTA, Node.js, Cloud Application Programming Model (CAP), CF Cli - SAP HANA Cloud - ABAP Rest Application Programming Model (RAP) - ABAP OO (specialized in development of complete new custom applications & frameworks) - ABAP Core Data Services (CDS) - SAPUI5, Fiori Elements & Fiori Launchpad, SAP Build - SAP Gateway & ODATA - SAP WebIDE, Eclipse, Visual Code, SAP Application Studio - Kubernetes, Docker - Git, Jenkins, CI/CD pipelines, SAP Project Piper - SAP Identity Authentication Service, KeyCloak - SAP Build partner experience, including SAP App Center - SAP HANA XS & XSA Native Development - SAP PO Repository, Directory, Adapters - S/4HANA on premise - ABAP/4, ABAP OO, (t)RFC, IDOC, BAPI, DOI & BDS - SAP Business Workflow - HTML5, CSS, JavaScript, jQuery, JSON - OData, REST, XML, XSLT, XQL, SOAP - .NET Framework, C#, Razor, Visual Studio - SAML, OAUTH, (S)MIME, RNIF 1.1, SSL, Certificates - Web site Design, Responsive Design, Umbraco - Hyperledger Fabric, Blockchain, Ethereum, Smart Contracts, Solidity
Certificates	- SAP certificate ABAP/4 consultant - Various 'Record Of Achievements' for the followed online openSAP courses
Followed Courses	- Andersen Consulting ABAP/4 Technical Academy - C++ Advanced Course - Implementing Business Solutions – Andersen Consulting - Analysis and Design School - Andersen Consulting - openSAP - In-Memory Data Management In a Nutshell - openSAP - An Introduction to SAP HANA - openSAP - Introduction to Software Development on SAP HANA - openSAP - Introduction to Mobile Solution Development - openSAP - SAP Business Suite powered by SAP HANA - openSAP - SAP's UX Strategy in a Nutshell by Sam Yen - openSAP - ABAP Development for SAP HANA

	- openSAP - Next Steps in Software Development on SAP HANA - openSAP - How the Internet of Things and Smart Services Will Change Society - openSAP - Software Development on SAP HANA (Delta SPS 09) - openSAP - SAP S/4HANA in a Nutshell - openSAP - Text Analytics with SAP HANA Platform - openSAP - Software Development on SAP HANA (Delta SPS 11) - openSAP - Developing Web Apps with SAPUI5 - openSAP - SAP HANA Cloud Platform Essentials - openSAP - Application Integration Made Simple with SAP HANA Cloud Integration - openSAP - Enterprise Machine Learning in a Nutshell - openSAP - Software Development on SAP HANA (Update Q4/2017) - openSAP - Writing Testable Code for ABAP - openSAP - SAP Leonardo - Enabling the Intelligent Enterprise - openSAP - SAP Leonardo – An Introduction to Blockchain - openSAP - SAP Leonardo Machine Learning Foundation – An Introduction - openSAP - Create and Deliver Cloud-Native SAP S/4HANA Extensions - openSAP - Software Development on SAP HANA (Update Q1/2019) - openSAP - SAP Cloud Platform Essentials (Update Q2/2019) - openSAP - Simplify Integration with SAP Cloud Platform Integration Suite - EDX LFS171 – Blockchain for Business – An introduction to Hyperledger Technologies
Given Courses	- Andersen Consulting ABAP/4 Technical Academy (3 weeks - America) - Andersen Consulting Introduction to ABAP/4 (2 weeks - America)
Specialties	- Excellent, high-quality developer - Fast learner and very logical minded - Creative, 'out-of-the-box' thinking - End-user focused with quality in mind
Remote Work	- Extensive experience with remote work (almost 3 years with fulltime for over 6 months) - Usage of remote working flow tools like Slack, Microsoft Teams, Google Hangouts, Notion - Own private office space with no disturbance

Linked In Recommendations

All my recommendations (23) can be viewed at http://www.linkedin.com/in/sedacrivity

"I've worked with Steven on a challenging MDG implementation and S/4 Hana SAP project.

Steven was the kind of person that had a good and decent solution for all problems we came across in our developments. Steven really thinks about the development that is needed and the write strategy and even design pattern he could use for that. As well as making sure that extending afterwards will not be a pain. Steven his developments are very good written and because of this, it's easier for another developer to take over an existing development and/or extend it. Steven not only stands out with his technical skills but also added value as a person to the team.

Not only is Steven a great developer, he was also a great mentor to myself and I've learned a lot from Steven on the project we worked together".

1st *Gianni Coenen, SAP Netweaver Consultant at TheValueChain NV*
worked directly with Steven at Sedacrivity

"Steven approaches every development with his vast experience and theoretical foundation. That combination is priceless,. Because next to having all requirements developed at an amazing pace, you can rest assured that the development is built best-practise. No need to worry about error processing, logging, future extensions, upgrades, documentation, ... Steven includes it as a second nature.

As an SAP developer/consultant, Steven differentiates himself with his architectural skills, his knowledge of the latest technology, his creativity and last but not least he's always pleasant to work with. In short, you'll never regret having Steven on your team." August 26, 2015

1st *Christiaan Deroost, Consultant and Owner at thesus*
worked directly with Steven at Sedacrivity

"It looks like I know Steven already for a very long time. Probably due to the several (success-) stories and other good things I heard from Steven within my professional and social network. I know Steven in person since almost one year and now I can confirm from my personal experience: All the stories are true!

Steven is a driven and highly skilled SAP Architect, having an in-depth knowledge of all aspects of system development and design, including SAP PI, ABAP OO, WebDynpro. Steven has a critical mind and combined with his broad expertise he can identify possible pitfalls and critical issues in advance. So, in discussions with Steven, you 'd better be prepared well. However, thanks to his open mind and interpersonal skills, it's always nice and instructive to work together.

Summarized: It's recommended to have Steven in your team." November 24, 2011

1st*Dirk Jacobs, Business Analyst, Umicore*
worked directly with Steven at Sedacrivity

"Sometimes you need some luck in life; one such lucky moment happened when Steven came into the picture (thank you Iris) at the time we started to implement SAP PI as central integration platform for old and new SAP and non-SAP applications. Steven is not only a very good programmer applying state-of-the-art techniques, but above all he guided us in the design and the building of a platform with extended functionality and with the required tools to manage, monitor and maintain this core integration system." August 7, 2011

Top qualities: Great Results, Expert, Creative

1st Neel Van den Bergh,
hired Steven as a Architect in 2009, and hired Steven more than once

"Every team has a one or two people who get asked for advice on....well, pretty much everything. In some teams, those people end up carrying the burden for...well, pretty much everybody. Steven & I aren't working on one of those teams. In fact, we're working with an exceptional group of folks, one of the strongest teams I've ever seen anywhere.

Even in that company, Steven's work is exceptional. He's the resource we all look to for the final word, the stroke of genius. He's one of the rare elites who not only rises above his peers at work, but maintains a well-rounded set of uncorporate, unboring interests as well." April 19, 2008

1st[Brian Clark](), e-Business Project Manager, Huntsman Corporation
worked directly with Steven at Sedacrivity

"Steven is a top-range professional. Although he is specialised in SAP, he knows his way around in all kinds of other technologies. Most pleasant is that Steven enjoys to participate in technical challenges and important: that he knows how to deliver! I could recommend Steven on any type of project, he is functionally involved he can more easily judge technical requirements. nick name The SAP Guru!" June 20, 2006

1st[Patrick Carmans](), Manager / Partner, Alphalogic
was with another company when working with Steven at Sedacrivity

"Steven was one of our top performing developers when he worked for us at the client site." May 16, 2006

1st[Bart De Ridder](), Partner, Accenture
managed Steven indirectly at Accenture
